This is the first English translation of *Husserliana XXIII*, the volume in the critical edition of Edmund Husserl's works that gathers together a rich array of posthumous texts on representational consciousness. The lectures and sketches comprising *Husserliana XXIII* come from a period of enormous productivity and pivotal development in Husserl's philosophical life, extending from the years immediately preceding the logical investigations (1900–01) almost to the time of his retirement in 1928. They make available the most profound and comprehensive Husserlian account of image consciousness, the awareness we have when we look at a picture or see a play, and of its relation to art and the aesthetic. They explore phantasy in depth and furnish nuanced accounts of perception and memory. They enrich the Husserlian analysis of time consciousness and offer a fascinating picture of the sometimes tortuous paths Husserl took in his efforts to comprehend how the forms of representation are constituted and how they are related to one another and to perception, phantasy, image consciousness, and memory. This volume should prove to be an indispensable resource for Husserlian phenomenologists and for anyone else interested in thinking about these fundamental phenomena.

W. V. Quine (1908–2000) was quite simply the most distinguished analytic philosopher of the later half of the twentieth century. His celebrated attack on the analytic synthetic tradition heralded a major shift away from the views of language descended from logical positivism. His most important book, *Word and Object*, introduced the concept of indeterminacy of radical translation, a bleak view of the nature of the language with which we ascribe thoughts and beliefs to ourselves and others. Quine is also famous for the view that epistemology should be naturalized, that is, conducted in a scientific spirit with the object of investigating the relationship between the inputs of experience and the outputs of belief. The eleven essays in this volume cover all the central topics of Quine's philosophy: the underdetermination of physical theory, analyticity, naturalism, propositional attitudes, behaviorism, reference, and ontology, positivism, holism, and logic.

Psychoanalysis is an experience of truths and lies in language; it is also a discourse and a praxis. Lacanian coordinates takes the reader from the beginning of Lacan's teaching from the logic of the signifier and the Lacanian subject to the drive and object *a* qua object *a*, the paradoxes of guilt, and finally to the desire of the other.
