a contemporary of giordano bruno and galileo tommaso campanella 1568 1639 was a controversial philosopher theologian astrologer and poet who was persecuted during the inquisition and spent much of his adult life imprisoned because of his heterodox views he is best known today for two works the city of the sun a dialogue inspired by plato s republic in which he prophesies a vision of a unified peaceful world governed by a theocratic monarchy and his well meaning defense of galileo which may have done galileo more harm than good because of campanella s previous conviction for heresy but campanella s philosophical poems are where his most forceful and undiluted ideas reside his poetry is where his faith in observable and experimental sciences his astrological and occult wisdom his ideas about deism his anti aristotelianism and his calls for religious and secular reform most put him at odds with both civil and church authorities for this volume sherry oush has selected campanella s best and most idiosyncratic poems which are masterpieces of sixteenth century italian lyrics displaying a questing mind of great if unorthodox brilliance and showing campanella s passionate belief in the intrinsic harmony between the sacred and secular

poems english italian

on the oxen born bees of the ancients bugonia and their relation to eristalis tenax a two winged insect 1894 is a scientific book written by carl robert osten sacken the book explores the concept of oxen born bees which were believed by ancient greeks to be born from the carcasses of oxen the author delves into the history and mythology surrounding these bees and their supposed origin as well as the scientific evidence that refutes this belief sacken also discusses the insect eristalis tenax commonly known as the drone fly which has often been mistaken for the oxen born bee he provides detailed descriptions and illustrations of both insects highlighting their physical similarities and differences the

book is a valuable resource for entomologists historians and anyone interested in the intersection of science and mythology overall on the oxen born bees of the ancients bugonia and their relation to eristalis tenax a two winged insect 1894 offers a fascinating look into the history and science of these two insects and their place in ancient mythology this scarce antiquarian book is a facsimile reprint of the old original and may contain some imperfections such as library marks and notations because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to their original work

Yeah, reviewing a books
