why did i write this book
i m still not sure
after all i m a researcher
which means i think i know how to write technical papers
but writing for a n technical audience is something i know nothing about
it took a lot of effort before i could force myself to sit down to write the first word
once i did however it was hard not to stop
when i started this project i didn t know that i had a lot to say
and in some sense the results show this the book is much longer than i even imagined it would be
worse yet is that there is a lot of material that i decided not to include
it s a good thing

that the publishers decided to limit how long the book could be however after much soul searching i think i now know the reasons why i wrote this book first and foremost this book tells an interesting story it s about the life of a checkers playing computer program chinook from its creation in 1989 to its retirement in 1996 in reality the story revolves around two people with different views of the program as the creator of chinook i wanted to push the program to become the best player in the world in much the same way that a father might encourage his son to excel at sports
